The global Creatine market size is expected to reach \$ 621 million by 2029, rising at a market growth of 1.3% CAGR during the forecast period (2023-2029).

Global key manufacturers of Creatine include AlzChem, Shanghai baosui Chemical, Inner Mongolia Chengxin Yongan Chemical, etc. Global top three manufacturers hold a share about 58%. The global origin is mainly concentrated in China and Europe. In terms of its product type, creatine 200 mesh holds the largest market share with about 69%, followed by creatine 80 mesh. In terms of its applications, health care products are its top application area, holding more than 75% of the market share.

Creatine is a naturally-occurring amino acid (protein building block) that's found in meat and fish, and also made by the human body in the liver, kidneys, and pancreas. It is converted into creatine phosphate or phosphocreatine and stored in the muscles, where it is used for energy. During high-intensity, short-duration exercise, such as lifting weights or sprinting, phosphocreatine is converted into ATP, a major source of energy within the human body.

This report studies the global Creatine production, demand, key manufacturers, and key regions.
