According to our (Global Info Research) latest study, the global Creatines market size was valued at US\$ 528 million in 2024 and is forecast to a readjusted size of USD 577 million by 2031 with a CAGR of 1.3% during review period.

Creatine is a naturally-occurring amino acid (protein building block) that's found in meat and fish, and also made by the human body in the liver, kidneys, and pancreas. It is converted into creatine phosphate or phosphocreatine and stored in the muscles, where it is used for energy. During high-intensity, short-duration exercise, such as lifting weights or sprinting, phosphocreatine is converted into ATP, a major source of energy within the human body.

Global key manufacturers of Creatines include AlzChem, Shanghai baosui Chemical, Inner Mongolia Chengxin Yongan Chemical, etc. Global top three manufacturers hold a share about 58%. The global origin is mainly concentrated in China and Europe. In terms of its product type, creatine 200 mesh holds the largest market share with about 69%, followed by creatine 80 mesh. In terms of its applications, health care products are its top application area, holding more than 75% of the market share.
