According to our (Global Info Research) latest study, the global Cresols (Ortho-Cresols, Meta-Cresols, and Para-Cresols) market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Cresols is an aromatic organic compound and obtained from coal tar or petroleum as a mixture of three stereoisomers i.e. Ortho Cresols, Meta Cresols and Para Cresols. It is generally referred as tricresol or cresolic acid and very toxic in nature. It is a strong dermal irritant and on inhalation by human, it may cause serious hazards such as dryness, nasal constriction, and throat irritation among others. However it is widely used for variety of applications such as disinfectants, antiseptics, preservative and agrochemicals among others.

Average price of cresol is subjected to change with geographies and does not follow volume to revenue ration in each individual geographies. Growing demand for specialty chemicals, pharmaceuticals intermediates and industrial lubricants is expected to drive global consumption of cresols. The growing demand for antioxidants and preservatives is another accelerator for global market of cresols. Sustainability of the global cresols market is majorly depends on price and availability of raw materials. However alarming government regulations on use of cresols for certain applications such as in cosmetics and hair and dye products may restrain the overall consumption of cresols across the globe.
