The global Crimping Tool Pliers market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A Electrical Wire and Cable Crimper is a tool that is used to join or connect two pieces of Wire and Cable material by using compression to form a connecting bond.

A Crimper can be used for a variety of different tasks and depends on what type of Crimper you are using. They are generally used for electricians and cabling, e.g., adding electrical connectors on to a wire or cable. Some crimpers also have cutters or wire strippers built-in as a multi-purpose tool which allows additional versatility across a range of applications.

As each cable size can be connected to a variety of different terminals, no single Crimper can handle every job. There are basic types of crimping tools: Electromechanical type, Manual Mechanical type, Manual Hydraulic type, Others.
