## Abstracts

The general care floor refers to a hospital unit where patients receive 24-hour general medical attention and/or post-surgical treatment. Usually, a GCF ward includes patients who require less care than that given in Intensive Care, Critical Care or speciality care units. Unfortunately, the economic downturn combined with ICU staffing and bed shortages has led to patients being moved earlier than desired from the CCU to the GCF. While GCF treatment is certainly less expensive, this unit is not fully equipped to provide continuous patient surveillance needed by higher priority patients. The general care units frequently have a higher patient to nurse ratios, lesser access to continuous surveillance technology, and reduced patient visibility because they have private patient rooms coupled with extended hallways. Thus, there is a need for medical organisations to focus on their speciality care department more which is why the Critical Condition Surveillance Systems market has become important recently.

## SCOPE OF THE REPORT:

This report studies the Critical Condition Surveillance Systems market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Critical Condition Surveillance Systems market by product type and applications/end industries.

Medical errors and adverse events are not very uncommon in critically ill patients. Millions of patients in the U.S. alone sustain medical injuries due to medical errors every year. Many of these preventable mistakes result in severe disability or even death on some occasions. The process of patient evaluation and risk assessment is often challenging in a hectic hospital environment. The Critical Condition Surveillance

Systems market helps medical organisations to reduce errors, ensure timely evaluation and intervention for critically ill patients, and also reduce their risk of developing both preventable and non-preventable complications.

The global Critical Condition Surveillance Systems market is valued at xx million USD in 2017 and is expected to reach xx million USD by the end of 2023, growing at a CAGR of xx% between 2017 and 2023.

The Asia-Pacific will occupy for more market share in following years, especially in China, also fast growing India and Southeast Asia regions.

North America, especially The United States, will still play an important role which cannot be ignored. Any changes from United States might affect the development trend of Critical Condition Surveillance Systems.
