A CRO (Contract Research Organization) is a company that provides clinical trial management services for the pharmaceutical, biotech, and medical device industries.

Although there are different types of CROs and diverse levels of specialization (distinct therapeutic areas for instance), typical CRO services include regulatory affairs, site selection and activation, recruitment support, clinical monitoring, data management, trial logistics, pharmacovigilance, biostatistics, medical writing, and project management, among others.

In a clinical trial, CROs are hired by sponsors to perform a set of tasks, taking various technical and administrative responsibilities on the sponsor's behalf. The main role of the CRO is to plan, coordinate, execute, and supervise the processes involved in the development of a clinical trial, being a central contact point between the sponsor and other trial actors (e.g. ethics committees, regulatory agencies, vendors, and hospitals).

Global core CRO in clinical trials players include Labcorp, IQVIA and Parexel etc. The top 5 companies hold a share about 40%. North America is the largest market, with a share about 45%, followed by Europe and Asia Pacific with the share about 35% and 20%.

In terms of product, phase iii trial is the largest segment, with a share about 35%. And in

terms of end users, the largest end user is pharmaceutical? with a share about 55%.
