A Cross Beater Mill is a type of grinding mill that uses a high-speed rotating beater to crush and grind materials. The beater is typically made of hardened steel and is designed with a series of ridges or teeth that catch and crush the material as it is thrown against them by the rotating motion of the beaters. Cross Beater Mills are frequently used for grinding hard, brittle materials such as minerals, ores, and rocks, but can also be used for softer materials like grains, seeds, and spices. They are commonly found in laboratories and industrial settings for sample preparation and analysis.
