## Abstracts

The global Cross Trade Logistics market size is expected to reach \$ 295586 million by 2032, rising at a market growth of 8.9% CAGR during the forecast period (2026-2032).

Cross Trade Logistics (also referred to as cross-border transshipment logistics or triangular trade logistics) is a specialized international logistics model where goods are transported from a supplier's country directly to a buyer's country without passing through the territory of the intermediary trading company's country. The intermediary (usually a trader, distributor, or agent) is responsible for coordinating the transaction, but does not take physical possession of the goods during the entire process.
