Abstracts

Growing preference for non-invasive and minimally invasive cosmetic surgical procedures coupled with biopharma innovation in treating skin diseases is the new trend observed in the dermatology space. Value addition by introducing new and effective skin treatment products has been the main focus area of various derma companies. Advances in cosmetic surgical procedures have led to introduction of less- trauma skin treatment procedures that are gaining high traction across hospitals, dermatology clinics and beauty clinics. Such is the case with Crow?s feet treatments that include a range of cosmetic solutions such as Botox, dermal fillers, topical creams and chemical peels. Higher rate of smoking and ultraviolet exposure are the main factors causing crow?s feet which is being witnessed on a large scale.
