Cryogenic pump is a special pump, which is designed to transport cryogenic liquid, such as liquid nitrogen, liquid argon, liquid hydrocarbons and liquefied natural gas, etc. in the field of petroleum, air separation equipment and chemical plant. Its application is conveying low temperature liquid from low pressure place to high pressure place. With the development of air separation technology, low temperature liquid is widely used and developed. The main function in the air separation equipment is liquid circulation, or to extract liquid from the storage tank and press the liquid into the carburetor, then convey to the user after vaporization.
