Abstracts

According to our (Global Info Research) latest study, the global Crypto Dedit Card market size was valued at US$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

'A crypto debit card allows the user to access the spending power of their Bitcoin and other cryptocurrency holdings.A debit card is a card from a financial institution like Visa or Mastercard that allows a user to make card-based payments that pull money from an account where a user has already deposited funds such as a bank account.

A crypto debit card is similar to a regular debit card in that the holder uses their own money to make purchases or withdraw cash from an ATM. Unlike regular debit cards, most crypto debit cards draw from the holder’s cryptocurrency accounts. This makes them a convenient way to convert cryptocurrency into fiat that you can use to make standard purchases. Other crypto debit cards allow you to preload fiat or digital currencies.

In addition to converting crypto into fiat, crypto debit cards often allow you to reduce foreign transaction fees and easily spend money in multiple currencies. Potential pitfalls include geographical restrictions and the triggering of taxable events for using cryptocurrency.'
