Global CT Detector Readout IC Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

https://marketpublishers.com/r/G358E99A2836EN.html
Date: September 2026
Pages: 90
Price: US$ 3,480.00 (Single User License)
ID: G358E99A2836EN

Abstracts

According to our (Global Info Research) latest study, the global CT Detector Readout IC market size was valued at US$ 95.28 million in 2025 and is forecast to a readjusted size of US$ 177 million by 2032 with a CAGR of 9.4% during review period.

CT Detector Readout IC is a specialized analog or mixed-signal integrated circuit used to acquire, condition, digitize, and transmit electrical signals generated by computed tomography detector elements. In conventional energy-integrating systems, the device connects primarily to scintillator–photodiode arrays and integrates low-level current over defined sampling periods before high-resolution analog-to-digital conversion. Commercial products commonly integrate multiple low-noise channels, simultaneous sampling, programmable input range, calibration functions, and high-speed serial output, with channel counts ranging from several dozen to several hundred and conversion resolution reaching up to 24 bits. In photon-counting CT, the readout function is implemented through pixel- or strip-based ASIC architectures that amplify individual charge pulses, apply energy thresholds, count events, perform energy binning, and control data transmission under high count-rate conditions. Key technical parameters include input noise, dynamic range, channel density, integration time, sampling rate, power consumption, linearity, count-rate capability, dead time, energy-bin count, crosstalk, thermal performance, and compatibility with scintillator–photodiode, CZT, CdTe, or silicon detector structures. The research scope focuses on dedicated readout devices used in medical diagnostic CT, security CT, industrial and nondestructive testing CT, dental and cone-beam CT, micro-CT, and preclinical imaging.

info@marketpublishers.com

Key Findings

The strict Core Formal List contains five verified manufacturers across merchant, captive, and module-integrated business models

Three high-confidence suppliers offer publicly documented merchant CT Detector Readout IC products

Energy-integrating readout ICs remain the commercial base while photon-counting ASICs lead product upgrading

Europe hosts three of the five verified core manufacturers while North America hosts two

Unit volume is measured in pieces but channel density and detector architecture determine system-level value

Market Trends

The principal development direction of the CT Detector Readout IC industry is the transition from conventional multi-channel current integration toward higher-density, more highly integrated, and spectrally capable readout architectures. Energy-integrating devices continue to improve through lower input noise, reduced power per channel, shorter integration time, higher channel count, simultaneous sampling, and simplified board-level connectivity. Photon-counting designs are moving the value proposition beyond conventional ADC performance by incorporating pulse amplification, threshold discrimination, event counting, multiple energy bins, and increasingly complex data-management functions. Detector materials and readout electronics are also becoming more closely coupled, particularly in CZT, CdTe, and silicon direct-conversion systems that require fine-pitch interconnection, hybrid bonding, thermal control, and detector-specific calibration. As a result, the industry is moving from component-level optimization toward coordinated development of detector material, ASIC architecture, packaging, firmware, and image-processing algorithms. Commercialization is also progressing from limited premium installations toward broader product portfolios and dedicated production capacity; Siemens Healthineers has disclosed an €80 million investment to expand photon-counting detector production in Forchheim, Germany.

Market Dynamics

Drivers

Demand for CT Detector Readout IC products is supported by continuing upgrades in CT image resolution, scanning speed, dose efficiency, spectral capability, and detector-row density. Medical system manufacturers require lower-noise and lower-power acquisition electronics to improve contrast-to-noise performance without increasing detector heat or system complexity. Photon-counting CT creates an additional semiconductor-content driver because each detector element requires event-level processing, energy discrimination, and substantially more complex data handling than conventional integration-based architectures. Security and industrial CT also support demand through increasing use of three-dimensional inspection, automated material identification, battery and electronics inspection, and high-throughput nondestructive testing. These applications favor readout products that combine high dynamic range, rapid acquisition, stable calibration, compact packaging, and long operational life.

Restraints

Market expansion is constrained by the specialized and relatively low-volume nature of CT readout semiconductor demand compared with mainstream analog and digital IC markets. Product development requires substantial nonrecurring engineering expenditure, long design cycles, application-specific packaging, and extensive system qualification, while sales volumes may remain concentrated in a limited number of CT platforms. Medical applications impose particularly demanding requirements for noise consistency, linearity, thermal stability, long-term availability, traceability, and change control. The increasing use of captive ASICs by major CT system manufacturers can reduce the accessible merchant market even when total semiconductor value per scanner is increasing. In addition, photon-counting devices face yield and cost pressure associated with fine-pitch detector interconnection, material uniformity, high channel density, data bandwidth, and heat dissipation. These conditions limit rapid supplier entry and make customer qualification costly for both incumbent and emerging manufacturers.

Opportunities

The most significant opportunity lies in photon-counting and spectral CT, where higher chip complexity, additional energy-processing functions, and closer detector integration

+357 96 030922
info@marketpublishers.com

can raise semiconductor value per system. Opportunities also exist in higher-channel-count energy-integrating products that reduce detector-board area, cabling, external components, and calibration complexity. Industrial inspection represents another attractive development area, particularly for battery cells, semiconductor packages, additive-manufactured parts, aerospace components, and automated production-line inspection requiring faster three-dimensional imaging. Security CT benefits from improved material discrimination and higher throughput, while dental, cone-beam, micro-CT, and preclinical systems offer opportunities for compact, low-power, application-specific designs. Localized semiconductor and detector supply chains may also create openings for custom ASIC providers, packaging companies, and regional system manufacturers that can demonstrate stable yield, detector compatibility, and long-term product support.

Challenges

The industry's main long-term challenge is converting advanced detector and ASIC concepts into repeatable, economically viable production. Photon-counting performance depends not only on the readout circuit but also on detector-material quality, pixel interconnection, threshold calibration, charge sharing, count-rate linearity, thermal design, and reconstruction software. Differences in detector geometry, material, system architecture, and proprietary interfaces reduce standardization and make it difficult for a single chip platform to address multiple CT manufacturers without customization. Intellectual-property protection and customer confidentiality further limit market transparency, particularly for captive ASICs and outsourced custom designs. Emerging suppliers must therefore overcome more than chip-design barriers; they must establish wafer and packaging yield, medical-grade reliability, application engineering capability, quality systems, and long-term supply commitments. Established suppliers also face the risk that conventional products may experience price erosion while next-generation development requires substantially higher investment.

Industry Chain Analysis

The CT Detector Readout IC industry chain begins with semiconductor design tools, analog and mixed-signal intellectual property, CMOS wafer processes, photodiodes, scintillators, CZT, CdTe, silicon detector materials, packaging substrates, interposers, and high-density interconnection technologies. The middle of the chain includes readout-architecture development, circuit design, wafer fabrication, wafer probing, packaging,

+357 96 030922
info@marketpublishers.com

final testing, calibration, and detector-level integration. Merchant standard IC suppliers retain responsibility for product definition, design, qualification, and lifecycle support while using a combination of internal and external manufacturing resources. Captive ASIC programs are controlled by CT system or detector manufacturers and may rely on external foundries, design-service companies, or packaging partners without disclosing the underlying manufacturing structure. Module-integrated suppliers add value by combining detector materials, readout ASICs, interconnection, thermal management, control electronics, and calibration into a qualified detector assembly. Downstream value is created through detector boards, data-acquisition systems, CT gantries, system control, reconstruction software, and application-specific imaging workflows. The largest cost components at chip level include engineering development, mask and wafer cost, mixed-signal testing, specialized packaging, yield management, and long-term quality assurance. Profitability depends less on raw wafer cost than on proprietary low-noise architecture, channel density, qualification status, design-in duration, manufacturing consistency, and the ability to support customers over extended equipment lifecycles.

Segment Insights

By readout principle, energy-integrating readout ICs remain the largest established commercial segment because the global installed base of conventional scintillator–photodiode CT systems continues to require new-production, replacement, and lifecycle-support components. Publicly documented merchant products currently cover 64-channel, 128-channel, and 256-channel configurations, with high-resolution conversion, simultaneous sampling, and low-noise current integration forming the central value proposition. Photon-counting readout ASICs represent the most technologically dynamic segment. Their growth is linked to pixel- or strip-level event processing, multiple energy thresholds, high count-rate operation, spectral imaging, and direct-conversion detector integration.

By product type, standard merchant readout ICs provide the most transparent product and pricing structure but are supplied by only a small number of verified manufacturers. Captive readout ASICs and module-integrated devices account for a less visible but strategically important share of industry value because they are embedded in proprietary detectors and complete CT systems. By detector interface, scintillator–photodiode products remain the commercial foundation, while CZT, CdTe, and silicon direct-conversion interfaces represent the principal technology-upgrade opportunity. By integration architecture, standalone packaged ICs remain important in conventional systems, whereas hybrid-bonded detector ASICs and increasingly

+357 96 030922
info@marketpublishers.com

integrated sensor-readout structures are more relevant to photon-counting designs.

Downstream Market Opportunities

Medical diagnostic CT remains the primary value pool because it places the highest requirements on image quality, reliability, dose efficiency, detector consistency, and long-term component availability. Within medical imaging, cardiac, neurological, oncological, musculoskeletal, pediatric, and emergency applications create demand for higher spatial resolution, faster acquisition, spectral information, and improved material differentiation. Security CT provides a separate opportunity through automated baggage and parcel screening, where high throughput and reliable material identification are central purchasing criteria. Industrial and nondestructive testing applications are expanding the addressable market toward battery inspection, semiconductor packaging, electronics, castings, aerospace parts, and advanced manufacturing quality control. Dental and cone-beam CT, micro-CT, and preclinical imaging offer smaller but technically differentiated opportunities for compact, low-power, and application-specific readout solutions.

Regional Insights

The supply structure is concentrated in Europe and North America. Europe hosts three of the five verified Core Formal List manufacturers and combines merchant semiconductor products, captive CT ASIC development, photon-counting detector integration, and specialized imaging-detector capabilities. North America hosts two verified merchant readout IC suppliers and also maintains significant system-level, detector, and direct-conversion technology development outside the strict chip-manufacturer list. Japan has vertically integrated photon-counting detector development through major medical imaging groups, although the available evidence does not support adding another independent merchant CT Detector Readout IC supplier to the strict core list. China represents the most active localization opportunity, with emerging capabilities in radiation-readout ASICs, detector front-end modules, packaging, and medical imaging semiconductors, but supplier qualification still depends on verifiable chip ownership, production yield, reliability, and adoption by established CT system manufacturers. South Korea, Taiwan, Southeast Asia, and India possess relevant semiconductor manufacturing or electronics capabilities, while confirmed proprietary CT readout product suppliers remain limited.

+357 96 030922
info@marketpublishers.com

Competitive Landscape Analysis

Texas Instruments, Infineon Technologies, and Analog Devices form the verified merchant supplier group, offering publicly documented multi-channel current-input conversion products for CT detector acquisition. Siemens Healthineers represents the captive ASIC model, where detector and readout technologies are developed as part of a vertically integrated CT platform rather than sold as standalone semiconductors. DECTRIS represents the module-integrated photon-counting model, combining ASIC capability with hybrid-pixel detector products and specialized imaging applications. Competitive advantage in merchant products is based on noise performance, channel density, power efficiency, conversion accuracy, product longevity, and customer qualification. Captive and module-integrated competitors differentiate through detector-material integration, packaging, calibration, spectral performance, and system-level control. The completed transfer of the former ams OSRAM non-optical analog and mixed-signal sensor portfolio to Infineon further consolidates ownership of established CT interface products and illustrates how strategic portfolio transactions can change supplier identity without materially expanding the number of qualified market participants.

Report Scope

This report is a detailed and comprehensive analysis for global CT Detector Readout IC market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global CT Detector Readout IC market size and forecasts, in consumption value ($ Million), sales quantity (Million Units), and average selling prices (US$/Unit), 2021-2032

Global CT Detector Readout IC market size and forecasts by region and country, in consumption value ($ Million), sales quantity (Million Units), and average selling prices (US$/Unit), 2021-2032

+357 96 030922
info@marketpublishers.com

Global CT Detector Readout IC market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (Million Units), and average selling prices (US$/Unit), 2021-2032

Global CT Detector Readout IC market shares of main players, shipments in revenue ($ Million), sales quantity (Million Units), and ASP (US$/Unit), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for CT Detector Readout IC

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global CT Detector Readout IC market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Siemens Healthineers AG, Texas Instruments Incorporated, Infineon Technologies AG, Analog Devices, Inc., DECTRIS AG, Brigates Microelectronics Co., Ltd., United Imaging Microelectronics, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

CT Detector Readout IC market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market Segmentation

+357 96 030922

South America (Brazil, Argentina, Colombia, and Rest of South America)

Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe CT Detector Readout IC product scope, market overview, market estimation caveats and base year.
Chapter 2, to profile the top manufacturers of CT Detector Readout IC, with price, sales quantity, revenue, and global market share of CT Detector Readout IC from 2021 to 2026.
Chapter 3, the CT Detector Readout IC competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.
Chapter 4, the CT Detector Readout IC breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2021 to 2032.
Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2021 to 2032.
Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2021 to 2026.and CT Detector Readout IC market forecast, by regions, by Type, and by Application, with sales and revenue, from 2027 to 2032.
Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.
Chapter 13, the key raw materials and key suppliers, and industry chain of CT Detector Readout IC.
Chapter 14 and 15, to describe CT Detector Readout IC sales channel, distributors, customers, research findings and conclusion.

1 MARKET OVERVIEW

1.1 Product Overview and Scope
1.2 Market Estimation Caveats and Base Year
1.3 Market Analysis by Type
  1.3.1 Overview: Global CT Detector Readout IC Consumption Value by Type: 2021 Versus 2025 Versus 2032
  1.3.2 Standard Readout IC
  1.3.3 Captive Readout ASIC
  1.3.4 Other Product Type
1.4 Market Analysis by Readout Principle
  1.4.1 Overview: Global CT Detector Readout IC Consumption Value by Readout Principle: 2021 Versus 2025 Versus 2032
  1.4.2 Energy-Integrating Readout IC
  1.4.3 Photon-Counting Readout ASIC
  1.4.4 Other Readout Principle
1.5 Market Analysis by Detector Interface
  1.5.1 Overview: Global CT Detector Readout IC Consumption Value by Detector Interface: 2021 Versus 2025 Versus 2032
  1.5.2 Scintillator-Photodiode Interface
  1.5.3 CZT or CdTe Interface
  1.5.4 Silicon Direct-Conversion Interface
  1.5.5 Other Semiconductor Detector Interface
1.6 Market Analysis by Integration Architecture
  1.6.1 Overview: Global CT Detector Readout IC Consumption Value by Integration Architecture: 2021 Versus 2025 Versus 2032
  1.6.2 Standalone Readout IC
  1.6.3 Hybrid-Bonded Detector ASIC
  1.6.4 Monolithic Sensor-Readout IC
  1.6.5 Other Integration Architecture
1.7 Market Analysis by Application
  1.7.1 Overview: Global CT Detector Readout IC Consumption Value by Application: 2021 Versus 2025 Versus 2032
  1.7.2 Medical Diagnostic CT
  1.7.3 Security CT
  1.7.4 Industrial and NDT CT
  1.7.5 Other

2.6.5 Brigates Microelectronics Co., Ltd. Recent Developments/Updates
2.7 United Imaging Microelectronics
2.7.1 United Imaging Microelectronics Details
2.7.2 United Imaging Microelectronics Major Business
2.7.3 United Imaging Microelectronics CT Detector Readout IC Product and Services
2.7.4 United Imaging Microelectronics CT Detector Readout IC Sales Quantity, Average Price, Revenue, Gross Margin and Market Share (2021-2026)
2.7.5 United Imaging Microelectronics Recent Developments/Updates

3 COMPETITIVE ENVIRONMENT: CT DETECTOR READOUT IC BY MANUFACTURER

3.1 Global CT Detector Readout IC Sales Quantity by Manufacturer (2021-2026)
3.2 Global CT Detector Readout IC Revenue by Manufacturer (2021-2026)
3.3 Global CT Detector Readout IC Average Price by Manufacturer (2021-2026)
3.4 Market Share Analysis (2025)
3.4.1 Producer Shipments of CT Detector Readout IC by Manufacturer Revenue ($MM) and Market Share (%): 2025
3.4.2 Top 3 CT Detector Readout IC Manufacturer Market Share in 2025
3.4.3 Top 6 CT Detector Readout IC Manufacturer Market Share in 2025
3.5 CT Detector Readout IC Market: Overall Company Footprint Analysis
3.5.1 CT Detector Readout IC Market: Region Footprint
3.5.2 CT Detector Readout IC Market: Company Product Type Footprint
3.5.3 CT Detector Readout IC Market: Company Product Application Footprint
3.6 New Market Entrants and Barriers to Market Entry
3.7 Mergers, Acquisition, Agreements, and Collaborations

4 CONSUMPTION ANALYSIS BY REGION

+357 96 030922
info@marketpublishers.com

4.1 Global CT Detector Readout IC Market Size by Region
4.1.1 Global CT Detector Readout IC Sales Quantity by Region (2021-2032)
4.1.2 Global CT Detector Readout IC Consumption Value by Region (2021-2032)
4.1.3 Global CT Detector Readout IC Average Price by Region (2021-2032)
4.2 North America CT Detector Readout IC Consumption Value (2021-2032)
4.3 Europe CT Detector Readout IC Consumption Value (2021-2032)
4.4 Asia-Pacific CT Detector Readout IC Consumption Value (2021-2032)
4.5 South America CT Detector Readout IC Consumption Value (2021-2032)
4.6 Middle East & Africa CT Detector Readout IC Consumption Value (2021-2032)

5 MARKET SEGMENT BY TYPE

5.1 Global CT Detector Readout IC Sales Quantity by Type (2021-2032)
5.2 Global CT Detector Readout IC Consumption Value by Type (2021-2032)
5.3 Global CT Detector Readout IC Average Price by Type (2021-2032)

6 MARKET SEGMENT BY APPLICATION

6.1 Global CT Detector Readout IC Sales Quantity by Application (2021-2032)
6.2 Global CT Detector Readout IC Consumption Value by Application (2021-2032)
6.3 Global CT Detector Readout IC Average Price by Application (2021-2032)

7 NORTH AMERICA

7.1 North America CT Detector Readout IC Sales Quantity by Type (2021-2032)
7.2 North America CT Detector Readout IC Sales Quantity by Application (2021-2032)
7.3 North America CT Detector Readout IC Market Size by Country
7.3.1 North America CT Detector Readout IC Sales Quantity by Country (2021-2032)
7.3.2 North America CT Detector Readout IC Consumption Value by Country (2021-2032)
7.3.3 United States Market Size and Forecast (2021-2032)
7.3.4 Canada Market Size and Forecast (2021-2032)
7.3.5 Mexico Market Size and Forecast (2021-2032)

8 EUROPE

8.1 Europe CT Detector Readout IC Sales Quantity by Type (2021-2032)
8.2 Europe CT Detector Readout IC Sales Quantity by Application (2021-2032)
8.3 Europe CT Detector Readout IC Market Size by Country

+357 96 030922
info@marketpublishers.com

8.3.1 Europe CT Detector Readout IC Sales Quantity by Country (2021-2032)
8.3.2 Europe CT Detector Readout IC Consumption Value by Country (2021-2032)
8.3.3 Germany Market Size and Forecast (2021-2032)
8.3.4 France Market Size and Forecast (2021-2032)
8.3.5 United Kingdom Market Size and Forecast (2021-2032)
8.3.6 Russia Market Size and Forecast (2021-2032)
8.3.7 Italy Market Size and Forecast (2021-2032)

9 ASIA-PACIFIC

9.1 Asia-Pacific CT Detector Readout IC Sales Quantity by Type (2021-2032)
9.2 Asia-Pacific CT Detector Readout IC Sales Quantity by Application (2021-2032)
9.3 Asia-Pacific CT Detector Readout IC Market Size by Region
9.3.1 Asia-Pacific CT Detector Readout IC Sales Quantity by Region (2021-2032)
9.3.2 Asia-Pacific CT Detector Readout IC Consumption Value by Region (2021-2032)
9.3.3 China Market Size and Forecast (2021-2032)
9.3.4 Japan Market Size and Forecast (2021-2032)
9.3.5 South Korea Market Size and Forecast (2021-2032)
9.3.6 India Market Size and Forecast (2021-2032)
9.3.7 Southeast Asia Market Size and Forecast (2021-2032)
9.3.8 Australia Market Size and Forecast (2021-2032)

10 SOUTH AMERICA

10.1 South America CT Detector Readout IC Sales Quantity by Type (2021-2032)
10.2 South America CT Detector Readout IC Sales Quantity by Application (2021-2032)
10.3 South America CT Detector Readout IC Market Size by Country
10.3.1 South America CT Detector Readout IC Sales Quantity by Country (2021-2032)
10.3.2 South America CT Detector Readout IC Consumption Value by Country (2021-2032)
10.3.3 Brazil Market Size and Forecast (2021-2032)
10.3.4 Argentina Market Size and Forecast (2021-2032)

11 MIDDLE EAST & AFRICA

11.1 Middle East & Africa CT Detector Readout IC Sales Quantity by Type (2021-2032)
11.2 Middle East & Africa CT Detector Readout IC Sales Quantity by Application (2021-2032)
11.3 Middle East & Africa CT Detector Readout IC Market Size by Country

+357 96 030922

11.3.1 Middle East & Africa CT Detector Readout IC Sales Quantity by Country (2021-2032)
11.3.2 Middle East & Africa CT Detector Readout IC Consumption Value by Country (2021-2032)
11.3.3 Turkey Market Size and Forecast (2021-2032)
11.3.4 Egypt Market Size and Forecast (2021-2032)
11.3.5 Saudi Arabia Market Size and Forecast (2021-2032)
11.3.6 South Africa Market Size and Forecast (2021-2032)

12 MARKET DYNAMICS

12.1 CT Detector Readout IC Market Drivers
12.2 CT Detector Readout IC Market Restraints
12.3 CT Detector Readout IC Trends Analysis
12.4 Porters Five Forces Analysis
12.4.1 Threat of New Entrants
12.4.2 Bargaining Power of Suppliers
12.4.3 Bargaining Power of Buyers
12.4.4 Threat of Substitutes
12.4.5 Competitive Rivalry

13 RAW MATERIAL AND INDUSTRY CHAIN

13.1 Raw Material of CT Detector Readout IC and Key Manufacturers
13.2 Manufacturing Costs Percentage of CT Detector Readout IC
13.3 CT Detector Readout IC Production Process
13.4 Industry Value Chain Analysis

14 SHIPMENTS BY DISTRIBUTION CHANNEL

14.1 Sales Channel
14.1.1 Direct to End-User
14.1.2 Distributors
14.2 CT Detector Readout IC Typical Distributors
14.3 CT Detector Readout IC Typical Customers

15 RESEARCH FINDINGS AND CONCLUSION

I would like to order

Product name: Global CT Detector Readout IC Market 2026 by Manufacturers, Regions, Type and Application, Forecast to 2032

Product link: https://marketpublishers.com/r/G358E99A2836EN.html

Price: US$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page https://marketpublishers.com/r/G358E99A2836EN.html
