Abstracts

According to our (Global Info Research) latest study, the global CT and PET Scanners market size was valued at USD 7229.4 million in 2023 and is forecast to a readjusted size of USD 7883 million by 2030 with a CAGR of 1.2% during review period.

CT machine, also called X-ray computed tomography (X-ray CT) or computerized axial tomography scan (CAT scan), makes use of computer-processed combinations of many X-ray images taken from different angles to produce cross-sectional (tomographic) images (virtual 'slices') of specific areas of a scanned object, allowing the user to see inside the object without cutting. Digital geometry processing is used to generate a three-dimensional image of the inside of the object from a large series of two-dimensional radiographic images taken around a single axis of rotation.

Medical imaging is the most common application of X-ray CT. Its cross-sectional images are used for diagnostic and therapeutic purposes in various medical disciplines.

Global CT and PET Scanners key players include GE Healthcare, Siemens Healthcare, Philips, Toshiba, Shimadzu, etc. Global top five players hold a share about 90%.
