According to our (Global Info Research) latest study, the global Curdlan market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Curdlan is a kind of lined beta-1,3-glucan, which is a high molecular mass polymer of glucose. Curdlan contains of  $\beta$ -(1,3) linked glucose deposits along with forming elastic gels when heated in aqueous solutions. It is also produced by non-pathogenic bacteria called as *Agrobacterium biovar*. Hence, the production of this curdlan by *Alcaligenes faecalis* bacteria is being produced to be used in gel production and other substances. Curdlan is a kind of neutral beta glucan polymer having few intra or interlinked chains which produces an exopolysaccharide by the help of soil bacteria. There are presence of various genes which are required for the production of curdlan that have been identified which produces curdlan in very large amounts for various applications. A membrane which is bounded by phosphatidylserine synthase which is also necessary for the production of large amounts of curdlan having very high molecular mass which is used in various end use applications. Curdlan is used as a kind of gelling agents in various applications such as in a variety of food products, pharmaceuticals, building materials and is also has been approved as a food additive by the U.S. Food and Administration Department.

The global Curdlan market driving factors are increasing demand for ready-to-eat snack foods coupled with the convenience of foods. Increasing opportunities in bakery industry is also another factor in driving the Curdlan market along with rising in production of Curdlan as a result of stabilizing agents used in various food applications. Manufacturers are focusing on providing healthier product offerings. Curdlan helps in improving various savory products thickening and is used by various manufacturers

worldwide. Curdlan is also used as a stabilizing agent in various pharmaceutical drugs and medicines. Curdlan consists of physical properties which is helpful in improving batter aeration, better dough plasticity along with improved resistance to staling in bakery products. Hence, the global Curdlan market is expected to observe robust growth over the forecast period.
