The global Current Leakage Tester market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A current leakage tester is a test instrument used to detect current leakage in electrical equipment or circuits. It is used to measure the magnitude of current leakage and evaluate the safety performance of electrical equipment or circuits. Current leakage means that the current in electrical equipment or circuits exceeds the expected or safe range, and is lost to the ground or other places through unintended paths. Current leakage may be caused by damaged equipment insulation, poor line contact, aging equipment, or other faults.
