According to our (Global Info Research) latest study, the global Curtain Coater market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Curtain coaters are used in coating curtains (or substrates) with a film as they pass on a conveyor belt below a holding tank. The tank releases fluid through an opening at its base onto the substrate. The coating's thickness is determined by the speed of the conveyor belt and the rate at which fluid is released from the holding tank. The majority of these machines come equipped with catch pans that capture any excess fluid for reuse.
