Abstracts

The global Custom Clothing Labels and Tags market size is expected to reach \$ 2253.8 million by 2029, rising at a market growth of 3.2% CAGR during the forecast period (2023-2029).

A clothing label is a tag attached to a garment that provides information about the product, such as the brand name, size, fabric content, washing instructions, and country of origin. Clothing labels can be made from various materials such as satin, cotton, or woven fabric, and can be sewn onto the garment or attached with heat seal adhesive. Hang tags, on the other hand, are tags that are attached to the garment with a string or ribbon and typically hang from the garment's neckline or a clothing rack. Hang tags often contain additional information about the product, such as the product's name, the brand logo, pricing information, and other promotional details. They can also be used to differentiate products and provide branding information. Both clothing labels and hang tags are important marketing tools for apparel brands. They provide customers with information about the product and can help to establish brand identity and increase brand recognition.
