According to our (Global Info Research) latest study, the global Customer Relationship Management (CRM) Lead Management market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

CRM lead management applications facilitate a business's inbound and outbound customer acquisition, online and offline. Lead management integrates business process and technology to close the loop between marketing and direct or indirect sales channels, and to drive higher-value opportunities through improved demand creation, execution and opportunity management. This critical connectivity facilitates business profitability through the acquisition of new customers and retention or upselling of existing customers. Lead management capabilities are provided by many marketing automation applications, but can also be acquired as part of a CRM suite. CRM lead management is the process of capturing leads, tracking their activities and behavior, qualifying them, giving them constant attention to make them sales-ready, and then passing them on to the sales team.
