Abstracts

The cutting board sterilizer uses high temperature or ultraviolet light to sterilize it, and at the same time uses high temperature hot air to dry it, further reducing or even avoiding the breeding of bacteria, and also set up different partitions to facilitate the cleaning of knives, chopsticks, cutting boards, and scissors. Storage can not only ensure the storage of kitchen utensils such as knives, but also sterilize and dry them, which can effectively prevent diseases from entering the mouth and ensure good health.
