A cutting duct is a component that allows electric wires to pass through its interior to improve the appearance and prevent electric shock.

A cutting duct is used when installing lighting fixtures and inside control panels. Since the wiring is not exposed, the scenery is improved and electric shock can be prevented. Raceways are used as power feeders to install lighting fixtures, depending on the width of the installation location. For a width of 2 inches or less, a raceway is recommended, and for a width of 2 inches or more, a cutting duct is recommended.
