According to our (Global Info Research) latest study, the global Cybersecurity Awareness Training Service market size was valued at US\$ 210 million in 2025 and is forecast to a readjusted size of US\$ 302 million by 2032 with a CAGR of 5.1% during review period.

Cybersecurity Awareness Training Service is a systematic educational intervention designed to enhance the awareness of cybersecurity threats among all employees, cultivate secure behavioral habits, and strengthen their sense of responsibility as human agents? a crucial element of defense. Its core is to transform complex security policies into understandable and actionable knowledge and skills through continuous, interactive, and realistic content (such as phishing email simulations, social engineering case studies, and data protection standards). This service not only covers the transmission of basic knowledge but also emphasizes behavioral change and culture shaping. It typically includes a closed-loop process encompassing training design, content delivery, simulated attack testing, effectiveness evaluation, and continuous reinforcement. The ultimate goal is to reduce the probability of security incidents caused by human error and to build a proactive security culture within the organization.

The global development of Cybersecurity Awareness Training Service exhibits regional differences in maturity while sharing common trends. In mature markets such as North America and Europe, services have moved beyond basic compliance, evolving towards standardization, refinement, and quantifiable results. They are deeply integrated with employee risk profiling, simulated phishing attacks, and industry-specific threat analysis, and are frequently incorporated into human resources and risk management processes. The Asia-Pacific region is experiencing rapid growth, particularly in China, India, and

Southeast Asia, driven by local data regulations and digital transformation. Demand has shifted from meeting mandatory training requirements to localized content, mobile learning, and specialized training for management. The Latin American, Middle Eastern, and African markets are primarily driven by the compliance needs of multinational corporations and key industries, and are currently in the stage of popularizing basic content. A common global trend is the shift in training from 'one-off courses' to a data-driven, continuously interactive service model, with behavioral change as the core metric.
