Abstracts

The global Cyclic Corrosion Cabinet market size is expected to reach \$ 105.7 million by 2029, rising at a market growth of 4.3% CAGR during the forecast period (2023-2029).

Cyclic Corrosion Testing (CCT) has evolved in recent years, largely within the automotive industry, as a way of accelerating real-world corrosion failures, under laboratory controlled conditions. As the name implies, the test comprises different climates which are cycled automatically so the samples under test undergo the same sort of changing environment that would be encountered in the natural world. The intention being to bring about the type of failure that might occur naturally, but more quickly i.e. accelerated.

This report studies the global Cyclic Corrosion Cabinet production, demand, key manufacturers, and key regions.
