## Abstracts

According to our (Global Info Research) latest study, the global Cylindrical Robot Arms market size was valued at US\$ 1101 million in 2025 and is forecast to a readjusted size of US\$ 1905 million by 2032 with a CAGR of 8.1% during review period.

In 2025, global Cylindrical Robot Arm output reached about 120,000 units and global capacity of around 170,000 units. The average unit price is about USD 9,000, with gross margins near 29%. Cylindrical Robot Arms are industrial robotic manipulators characterized by a cylindrical coordinate configuration, where the arm operates through a combination of rotational motion around a vertical axis and linear motion along radial and vertical directions. Typically consisting of a base rotation joint, a vertical linear slide, and a radial extension mechanism, cylindrical robots create a cylindrical working envelope that allows efficient positioning and handling tasks. These robots are widely used in assembly, machine tending, material handling, injection molding, and pick-and-place operations, especially in applications requiring vertical reach and simple horizontal positioning. The supply chain of cylindrical robot arms begins with upstream component suppliers providing precision mechanical parts such as servo motors, gear reducers, linear actuators, bearings, ball screws, controllers, sensors, and industrial control electronics, along with structural materials including aluminum alloys and high-strength steels. Midstream manufacturers and robotics integrators design and assemble cylindrical robot systems by integrating motion control systems, drive modules, end-effectors, and safety systems. Downstream distribution channels and system integrators deliver these robots to end users across industries such as automotive manufacturing, electronics assembly, semiconductor fabrication, metal processing, packaging, and logistics automation, where cylindrical robots serve as cost-effective solutions for repetitive positioning and handling tasks within a defined cylindrical workspace.
