## Abstracts

The global Cystatin C ELISA Kit market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Cystatin C ELISA (Enzyme-Linked Immunosorbent Assay) Kit is a laboratory diagnostic tool used for the quantitative measurement of Cystatin C in biological samples, typically blood serum or plasma. Cystatin C is a low-molecular-weight protein produced by nucleated cells in the human body and is primarily used as a marker for kidney function. It is freely filtered through the glomerular filtration barrier in the kidneys and is almost completely reabsorbed and catabolized in the renal tubules. Therefore, the concentration of Cystatin C in the blood can be indicative of renal function.

This report studies the global Cystatin C ELISA Kit production, demand, key manufacturers, and key regions.
