According to our (Global Info Research) latest study, the global Cytotoxic T Cells (CTL) market size was valued at US\$ 98 million in 2025 and is forecast to a readjusted size of US\$ 169 million by 2032 with a CAGR of 8.1% during review period.

Cytotoxic T Cells, or CTLs, are an integral part of the adaptive immune system. CTLs are often referred to as CD8 T-cells because they express the CD8 co-receptor that enables the CTL-antigen interaction critical in CTLs identifying viruses, bacteria, or cancer cells in the body and destroying them. CTLs kill specific cells by releasing specific compounds called perforin and granzyme B which cause pathogenic cells to lyse and die.
