Abstracts

The global D-(-)-Pantolactone market size is expected to reach \$ 218 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032).

In 2025, global D-(-)-Pantolactone production reached approximately 15 k tons, with an average global market price of around US\$9,580 per ton. D-(-)-Pantolactone is a lactone that is produced by the bacterial strain *Pantoea agglomerans*. It is an intermediate in the biosynthesis of pantothenic acid and calcium pantothenate.

The global D-pantolactone market is driven by downstream vitamin industry demand and process technology upgrades. As a key chiral intermediate in the production of D-calcium pantothenate and D-panthenol, market trends for D-pantolactone are closely tied to pantothenate-based products. D-calcium pantothenate has stable applications in feed additives, food fortification and pharmaceuticals, while D-panthenol is widely used in cosmetics and personal care products, providing sustained market support. The Asia-Pacific region, with its fine chemical industrial clusters, has become the primary supply hub for D-pantolactone with well-established industrial chains. European and North American markets, as major consumption regions for premium pantothenate products, maintain high quality standards for optical purity and process traceability. In terms of production technology, bio-fermentation and enzymatic resolution methods are gaining wider adoption, with multiple technology upgrade projects receiving environmental approvals from local authorities, indicating policy support for green manufacturing. Drug regulatory authorities continue to enforce compliance requirements for intermediate producers through API re-registration and site inspections. The market is shifting from traditional chemical synthesis dominance toward a competitive landscape built on bio-manufacturing technology, process stability and regulatory compliance.

This report studies the global D-(-)-Pantolactone production, demand, key manufacturers, and key regions.
