D2 Tool Steel is a high-carbon, high-chromium cold work steel known for excellent wear resistance, good compressive strength, and strong dimensional stability after heat treatment. It is widely used in dies, punches, knives, shear blades, slitting tools, and precision industrial tooling. Its balanced hardness and edge retention make it suitable for demanding processing conditions involving repeated abrasion and long service life requirements.

The industrial chain of D2 Tool Steel includes upstream alloy materials, scrap steel, melting additives, refractory materials, and heat treatment supplies. Midstream covers steelmaking, refining, casting, forging, rolling, annealing, quenching, tempering, machining, and quality inspection. Downstream applications mainly include stamping tools, industrial blades, cutting dies, wear parts, precision molds, and aftermarket tooling refurbishment services.
