Abstracts

The global Daily Regional Email Forecasts market size is expected to reach \$ 1364 million by 2032, rising at a market growth of 6.9% CAGR during the forecast period (2026-2032).

Daily Regional Email Forecasts Services refer to subscription-based weather forecasting services that deliver daily regional weather outlooks, operational forecasts, risk alerts, or meteorological briefings to users by email. These services are usually customized by geographic area, marine zone, agricultural region, logistics corridor, construction site, energy asset, offshore platform, or other operating area, and may include temperature, wind, rainfall, storm risk, sea conditions, visibility, road weather, severe-weather alerts, and short- to medium-term outlooks. Compared with general weather apps, daily regional email forecast services emphasize structured, repeatable, location-specific, and decision-oriented forecasting, often supported by professional meteorologists, proprietary weather models, automated alert systems, and industry-specific interpretation.

Demand for Daily Regional Email Forecasts Services is driven by industries whose operations are directly affected by weather risk, including agriculture, marine transportation, offshore energy, road maintenance, utilities, construction, logistics, aviation support, outdoor events, insurance, and emergency management. These users need reliable daily briefings that can be directly shared with teams, clients, dispatchers, captains, field crews, or management, making email still valuable despite the growth of apps and dashboards. Business opportunities are strongest in high-value vertical scenarios such as marine routing, farm weather advisory, renewable energy forecasting, winter road operations, severe-weather risk monitoring, and site-specific enterprise safety alerts. Providers with accurate local forecasting, clear regional

segmentation, automated email delivery, expert meteorologist support, and integration with SMS, API, dashboard, or workflow systems can build recurring subscription revenue and long-term enterprise relationships.

This report studies the global Daily Regional Email Forecasts demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Daily Regional Email Forecasts, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Daily Regional Email Forecasts that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Daily Regional Email Forecasts total market, 2021-2032, (USD Million)

Global Daily Regional Email Forecasts total market by region & country, CAGR, 2021-2032, (USD Million)

U.S. VS China: Daily Regional Email Forecasts total market, key domestic companies, and share, (USD Million)

Global Daily Regional Email Forecasts revenue by player, revenue and market share 2021-2026, (USD Million)

Global Daily Regional Email Forecasts total market by Service Delivery Model, CAGR, 2021-2032, (USD Million)

Global Daily Regional Email Forecasts total market by Application, CAGR, 2021-2032, (USD Million)

This report profiles major players in the global Daily Regional Email Forecasts market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Marine Weather Center, AccuWeather For Business, DTN, StormGeo, The Weather Company, Meteomatics, MetDesk, Infoplaza, Praedictix, Western Weather Group, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the world Daily Regional Email Forecasts market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), by player, by regions, by Service Delivery Model, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.
