## Abstracts

According to our (Global Info Research) latest study, the global CT Scanners market size was valued at USD 8538.3 million in 2023 and is forecast to a readjusted size of USD 11110 million by 2030 with a CAGR of 3.8% during review period.

Computed axial tomography (CAT), popularly known as computed tomography (CT), has diversified applications in the healthcare industry. CT uses computer-processed X-ray images taken from different angles, and combines them to produce cross-sectional images of specific areas of the scanned object.

This device allows medical practitioners to get an internal view of an object without dissecting it. Constant developments in technology and supportive government policies for healthcare funding are expected to boost the growth of the market. In addition, growing incidence of chronic diseases, need for early diagnosis, and high clinical utility of CT are expected to drive the market. Factors such as high installation cost of CT systems and side effects due to radiation exposure hinder the market growth.

The Global Info Research report includes an overview of the development of the CT Scanners industry chain, the market status of Hospital (High-end Slice CT Scanner, Mid-end Slice CT Scanner), Clinics (High-end Slice CT Scanner, Mid-end Slice CT Scanner), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of CT Scanners.

Regionally, the report analyzes the CT Scanners markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness. Asia-Pacific, particularly China, leads the global CT Scanners market, with robust domestic demand, supportive policies, and a strong

manufacturing base.
