According to our (Global Info Research) latest study, the global Dairy Free Vegan Cheese market size was valued at US\$ 2724 million in 2025 and is forecast to a readjusted size of US\$ 4791 million by 2032 with a CAGR of 8.5% during review period.

Dairy free vegan cheese is a non-dairy analogue aimed at vegans and other people who want to avoid animal products, including those who are lactose-intolerant. As with plant milk, dairy free vegan cheese can be made from cashews, sesame seeds, sunflower seeds, soybeans, coconut oil, rice, almonds and other nuts, and nutritional yeast.

The rising acceptance of veganism, especially among millennials, has been driving market growth. Shifting consumer food preferences and evolving trends in the food and beverage industry are driving global demand for vegan cheese. In recent years, cases of lactose intolerance and other food-related allergies have increased in children and adults, changing consumer food preferences. Growing awareness about the negative impact of the dairy industry on the environment, encouraging consumers to opt for plant-based products, and an inclination towards vegetarian and vegan diets are expected to drive industry growth in the Hotel/Restaurant/Cafe (HoReCa) sector.
