A Damascus Chef Knife is a premium culinary tool crafted from Damascus steel, characterized by distinctive wavy or mottled patterns visible on the blade's surface. These patterns, reminiscent of flowing water or wood grain, are the result of forge-welding multiple layers of steel together.

In contemporary bladesmithing, most Damascus knives feature a laminated construction: a high-carbon 'super steel' core (such as VG-10) is sandwiched between layers of softer stainless steel. This technique combines the best of both worlds—the core provides a razor-sharp, long-lasting edge, while the outer layers offer flexibility and corrosion resistance. Beyond its functional superiority, the Damascus chef knife is highly coveted by professional chefs and collectors alike as a symbol of craftsmanship and aesthetic elegance.

In 2025, global Damascus Chef Knife production reached approximately 5 million units and average price was 100 usd/unit, with gross margin 30%.
