The global Damascus Steel Knives market size is expected to reach \$ 873 million by 2032, rising at a market growth of 7.8% CAGR during the forecast period (2026-2032).

Damascus steel knives are bladed tools renowned for their distinctive surface patterns, which resemble flowing water, swirling clouds, or intricate mottling. Modern Damascus knives are typically produced through a 'pattern-welding' process, involving the repeated heating, folding, and forging of multiple layers of different steels. This metallurgical technique creates a blade that harmonizes a razor-sharp, high-carbon edge with superior toughness and flexibility. Beyond their exceptional cutting performance, Damascus knives are highly prized by collectors and culinary professionals as functional works of art with unique, non-replicable aesthetics.

In 2025, global Damascus steel knives production reached approximately 5 million units and average price was 100 usd/unit, with gross margin 45%.

This report studies the global Damascus Steel Knives production, demand, key manufacturers, and key regions.
