Abstracts

Damper Actuators is a device that controls the opening and closing of a damper in an HVAC or heating, ventilation and air conditioning system.

Scope of the Report:

This report focuses on the Damper Actuators in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. First, for industry structure analysis, the Damper Actuators industry is relatively concentrated. These manufacturers ranging from large multinational corporations to small privately owned companies compete in this industry. The top five producers account for about 60% of the revenue market in 2015. Regionally, USA is the biggest production area, also the leader in the whole Damper Actuators industry.

Second, the production of Damper Actuators increased from 11916 K Units in 2011 to 13871 K Units in 2015 with an average growth rate of more than 3.87%.

Third, Europe occupied 32.67% of the production market in 2015. It is followed by China and Japan, which respectively have around 11.33% and 8.33% of the global total industry. Geographically, USA was the largest consumption market in the world, which took about 34.57% of the global consumption volume in 2015.

Fourth, for price trend analysis, a key variable in the performance of Damper Actuators producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

Fifth, for forecast, the global Damper Actuators revenue would keep increasing with annual growth rate with 3~5%. We tend to believe that this industry still has a bright future, considering the current demand of Damper Actuators.

The worldwide market for Damper Actuators is expected to grow at a CAGR of roughly 2.2% over the next five years, will reach 1760 million US\$ in 2023, from 1540 million US\$ in 2017, according to a new GIR (Global Info Research) study.
