According to our (Global Info Research) latest study, the global Data Center Accelerator Card market size was valued at USD 1333.5 million in 2023 and is forecast to a readjusted size of USD 2059 million by 2030 with a CAGR of 6.4% during review period.

Modern data centers are being transformed to increase networking bandwidth and optimize workloads like artificial intelligence. Data center administrators also expect lower TCO, lower power, and new services. Data centers accelerators are helping customers meet these demands. The data centers accelerators facilitate a significant increase in the performance of these data centers. Moreover, due to resource sharing with the main processor, accelerators and general-purpose processors in data centers consume less power. The growing demand for AI in HPC data centers is driving the market growth. The growth in consumer-generated data and increasing use of AI-based services have propelled the demand for AI-centric data centers.

Data center is a key driver of this industry. Global data center market revenue is expected to reach \$342 billion by 2023, up from \$321 billion in 2022.
