Abstracts

According to our (Global Info Research) latest study, the global Data Center Active Electrical Cable (AEC) market size was valued at US\$ 831 million in 2025 and is forecast to a readjusted size of US\$ 3591 million by 2032 with a CAGR of 21.5% during review period.

Active Electrical Cable (AEC) for data centers is a high-speed copper interconnect solution that integrates active components like retimers in the connectors to amplify, equalize, and regenerate signals. This extends reliable transmission distances to 5-7 meters (or more) while maintaining low power consumption and cost, supporting rates up to 400G/800G. Compared to passive DAC cables, AEC offers better signal integrity and thinner, lighter cabling; versus AOC, it avoids optical-electrical conversion for lower power and expense. AEC is emerging as a preferred option for short-to-medium reach links in AI-driven data centers and cloud infrastructures, enabling distributed disaggregated chassis (DDC) architectures. In 2025, global Data Center Active Electrical Cable (AEC) production reached approximately 1600 K units, with an average global market price of around US\$ 504.5 per unit. The production capacity for Data Center Active Electrical Cable (AEC) in 2025 was approximately 1800 K units. The typical gross profit margin for Data Center Active Electrical Cable (AEC) is between 20% and 40%.
