## Abstracts

Job search sites — also known as job boards or job search engines — are web-based platforms used to connect employers with job seekers. Employers use these platforms to post open positions that they are looking to fill, while job seekers visit a corresponding website or use an app to browse job opportunities. Job search sites may sell and host job posts on their websites, aggregate posts from other sources like company career pages, or do a combination of both. Companies and staffing firms use job search sites to broaden the reach of their hiring efforts in order to attract a larger pool of highly qualified candidates.
