Abstracts

Data monetization, a form of monetization, is the act of generating measurable economic benefits from available data sources. Typically these benefits accrue as revenue or expense savings, but may also include market share or corporate market value gains. Data monetization leverages data generated through business operations, available exogenous data or content, as well as data associated with individual actors such as that collected via electronic devices and sensors participating in the internet of things. For example, the ubiquity of the internet of things is generating location data and other data from sensors and mobile devices at an ever increasing rate. The data in this report is based on data analytics software fees and service fees for Data Monetization.

SCOPE OF THE REPORT:

This report studies the Data Monetization market status and outlook of Global and major regions, from angles of players, countries, product types and end industries; this report analyzes the top players in global market, and splits the Data Monetization market by product type and applications/end industries.
