Abstracts

The global Davana Oil market size is expected to reach \$ 837 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

Global davana oil sales reached 445 tons in 2025, with an average price of US\$1321 per kilogram.

Davana Essential Oil. Davana Essential Oil is typically steam distilled from the leaves and flowers of *Artemisia pallens*, a shrub that is primarily found in India. Aromatically, Davana Essential Oil possesses a rich, fruity, slightly woody aroma. It is appreciated and used within natural fragancing applications.

The sole raw material for davanna oil is the tender, leafy shoots of the annual herb **Artemisia pallens** (commonly known as davanna), a plant endemic to India, during its peak flowering season. All production is concentrated in the states of Karnataka and Tamil Nadu; the yield of essential oil is less than 0.6 kg per acre. The purchase price of the flowers is \$25?30/kg, with raw material costs accounting for 60?65% of the ex-factory price. Processing uses steam distillation, yielding only 0.4?0.6% oil. Including fuel (firewood/oil), distillation vessel depreciation, labor, and testing costs, the total processing cost accounts for 25?30%. Therefore, a 10% fluctuation in raw material prices can directly translate to a 6?7% increase in the finished product price.

This report studies the global Davana Oil production, demand, key manufacturers, and key regions.
