Abstracts

According to our (Global Info Research) latest study, the global DC and PKI market size was valued at US$ 15670 million in 2024 and is forecast to a readjusted size of USD 21380 million by 2031 with a CAGR of 4.6% during review period.

The current technological world is evolving constantly along with creating a huge demand for digital authentication frameworks. Public key infrastructure or PKI is the platform that issues digital certificates or DC to enterprises operating or communicating with their users over internet.

The global DC (Data Center) and PKI (Public Key Infrastructure) market refers to the market for data center services and solutions that incorporate public key infrastructure technologies to ensure secure communication and data protection.

Data centers are facilities that house computing systems, servers, storage devices, and networking equipment. They provide a centralized location for organizations to store, manage, and process large amounts of data. With the increasing reliance on digital services and the rise of big data, the demand for data center infrastructure and services has been growing significantly.

Public Key Infrastructure (PKI) is a set of technologies, policies, and procedures that establish a secure communication framework using cryptographic keys. PKI enables secure digital transactions, authentication, data encryption, and digital signatures. It ensures the confidentiality, integrity, and authenticity of data and communications.

The global DC and PKI market is driven by several factors. The growing need for secure data storage, transmission, and authentication in various industries, such as banking,

healthcare, government, and e-commerce, is a significant driver. Data breaches and cyber threats have increased the demand for robust security solutions, including PKI-enabled data centers.

Furthermore, the increasing adoption of cloud computing and the Internet of Things (IoT) has led to the proliferation of data centers and the need for secure communication between devices and systems. PKI technologies play a crucial role in enabling secure connections and authenticating devices in these environments.

The market can be segmented based on the type of data center services, including colocation, managed hosting, and cloud services. It can also be classified based on the type of PKI services, such as certificate authorities, registration authorities, and certificate management services.

Geographically, North America dominates the global DC and PKI market due to the presence of established data center providers and a strong focus on cybersecurity. Europe and Asia Pacific are also significant contributors to the market growth, driven by increasing data center investments and regulatory requirements for data protection.

In conclusion, the global DC and PKI market is witnessing significant growth due to the increasing need for secure data storage, transmission, and authentication. The convergence of data centers and PKI technologies is playing a crucial role in addressing cybersecurity challenges and ensuring the integrity of digital communications and transactions. As organizations continue to prioritize data security, the demand for DC and PKI solutions is expected to grow in the coming years.

This report is a detailed and comprehensive analysis for global DC and PKI market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global DC and PKI market size and forecasts, in consumption value ($ Million), 2020-2031

info@marketpublishers.com

Global DC and PKI market size and forecasts by region and country, in consumption value ($ Million), 2020-2031

Global DC and PKI market size and forecasts, by Type and by Application, in consumption value ($ Million), 2020-2031

Global DC and PKI market shares of main players, in revenue ($ Million), 2020-2025

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for DC and PKI

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global DC and PKI market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Ascertia, Version, Inc., Signix, Inc., Docusing Inc., Identrust, Inc., Comodo Group, Inc., GMO GlobalSign, Inc., GoDaddy Group, Thales Group, Kofax Limited (A Lexmark Company), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market segmentation

DC and PKI market is split by Type and by Application. For the period 2020-2031, the growth among segments provides accurate calculations and forecasts for Consumption Value by Type and by Application. This analysis can help you expand your business by targeting qualified niche markets.
