DCDMH is a halogenated organic compound primarily used as a disinfectant and oxidizing agent. It is characterized by its strong sterilization capability, ease of storage, and high stability. DCDMH releases active halogens slowly, providing long-lasting effectiveness in inhibiting the growth of bacteria, viruses, and algae in water systems. It is widely used in swimming pools, industrial water treatment, and drinking water purification. Additionally, DCDMH is favored for its minimal impact on water pH and safe, user-friendly application.
