## **Abstracts**

The hybrid deployment mode is gaining a high traction in the market, as mitigating all DDoS attacks is challenging. The hybrid deployment mode safeguards critical enterprise data on-premises and stores other data in the cloud environment. Hybrid deployment solutions protect organizations' IT infrastructure from multi-vector DDoS attacks before these attacks snowball into a huge problem. Enterprises can retain all their critical data and intellectual properties within their premises and ensure their safety from network-based, protocol-based, and application-based DDoS attacks.
