Abstracts

Dealkalizers reduce unwanted an-ions in the ion exchange process. Used mainly in commercial and industrial applications for the reduction of alkalinity in boiler and cooling tower applications, and also in process streams where required.

Dealkalizers operate much the same as a softener. The exception is in the chloride cycle; the reduction of alkalinity reduces blowdown and chemical use in applications, thus reducing operational costs.

According to our (Global Info Research) latest study, the global Dealkalizers market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
