## Abstracts

According to our (Global Info Research) latest study, the global Decoking Equipment market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Decoking equipment is specialized machinery and tools used in the oil refining and petrochemical industries to remove coke deposits that accumulate on the interior surfaces of processing equipment. Coke, a carbonaceous material, forms during high-temperature processes like coking. These deposits can impede the efficiency and functionality of the equipment. The purpose of decoking equipment is to efficiently remove this coke buildup, ensuring optimal operational performance and extending the lifespan of the equipment.
