## Abstracts

The global Decoking Equipment market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Decoking equipment is specialized machinery and tools used in the oil refining and petrochemical industries to remove coke deposits that accumulate on the interior surfaces of processing equipment. Coke, a carbonaceous material, forms during high-temperature processes like coking. These deposits can impede the efficiency and functionality of the equipment. The purpose of decoking equipment is to efficiently remove this coke buildup, ensuring optimal operational performance and extending the lifespan of the equipment.
