The global Decontamination Pool market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Decontamination pools, also known as decon pools, are temporary or permanent containment structures designed to hold contaminated water or other liquids during decontamination operations. These pools are commonly used in industries such as nuclear power generation, oil and gas, and chemical manufacturing, where the risk of contamination is high.

The upstream industry chain of decontamination pools includes the production and supply of raw materials such as plastic and metal, as well as the manufacturing of pumps, filters, and other equipment used in the construction and operation of the pools. The downstream industry chain includes industries that require decontamination services, such as nuclear power plants, chemical plants, and oil refineries.

The global market for decontamination pools is highly fragmented, with numerous manufacturers operating in different regions around the world.

This report studies the global Decontamination Pool production, demand, key manufacturers, and key regions.
