## Abstracts

This report studies the Deep Hole Drilling market, from angles of players, regions, product types and end industries, to analyze the status and the future.

A deep hole drilling machine is a metal-cutting machine tool, designed to produce very deep, precision holes into virtually any metal. Deep hole drilling machines enable the performance of specific tools such as BTA and gundrills, to optimize the deep hole drilling process for manufacturers. Machines are engineered to integrate the technology used by these tools, and optimize all aspects of the process, to drill deep holes with accuracy, reliability, and efficiency.

### Scope of the Report:

This report focuses on the Deep Hole Drilling in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

For industry structure analysis, the Deep Hole Drilling industry is relatively fragmented. TBT, Mollart, Kays Engineering, Entrust and GSM are the main manufacturers. The top five manufactures account for about 43.26% of the revenue market. Regionally, Asia-Pacific is the largest consumption area of Deep Hole Drilling, also the leader in the whole Deep Hole Drilling industry.

The United States occupied 24.06% of the market in 2017. It is followed by South America, which respectively have around 4.87% of the total industry. Other regions have a small amount of sales.

For price trend analysis, a key variable in the performance of Deep Hole Drilling producers is raw material costs, specifically the speed at which any increase can be passed through to customers.

The worldwide market for Deep Hole Drilling is expected to grow at a CAGR of roughly 5.6% over the next five years, will reach 240 million US\$ in 2023, from 170 million US\$ in 2017, according to a new GIR (Global Info Research) study.
