## Abstracts

According to our (Global Info Research) latest study, the global Deep Sea Fish Oil market size was valued at USD 1667.9 million in 2023 and is forecast to a readjusted size of USD 2007.1 million by 2030 with a CAGR of 2.7% during review period.

Fish oil is an oil rich in EPA(eicosapentaenoic acid) and DHA(docosahexaenoic acid). The amount of EPA and DHA in common fish is very small, while the amount of EPA and DHA in Marine fish, such as anchovies, anchovies and sardines, is high. Because there is no essential difference between common Marine fish oil and deep-sea fish oil EPA and DHA, major deep-sea fish species have achieved large-scale artificial cultivation. Also subject to cost and price constraints, deep-sea fish are no longer caught for fish oil extraction.

The main manufacturers of Global Deep Sea Fish Oil include TASA, Diamante, Austevoll Seafood ASA, etc. These top three manufacturers hold a market share about 15%. South America is the major producing region in the world, with 44% market share. In terms of application, the product is most widely used in feed, followed by dietary supplement.
