## Abstracts

The global Deep Trench Capacitors (DTC) market size is expected to reach \$ 39.48 million by 2032, rising at a market growth of 8.6% CAGR during the forecast period (2026-2032).

A Deep Trench Capacitor (DTC) is a capacitor in which the effective electrode area is dramatically increased by creating deep vertical trenches in silicon rather than using a traditional planar structure. Dielectric and electrode materials are deposited conformally along the trench walls, turning the capacitor from a 2D planar device into a 3D structure. This approach enables much higher capacitance per unit area, lower parasitic inductance, and closer integration with active devices compared with conventional planar MOS or MIM capacitors.

In 2025, global Deep Trench Capacitors (DTC) production reached approximately 4000 K units, with an average global market price of around US\$ 5 per unit. The production capacity for Deep Trench Capacitors (DTC) in 2025 was approximately 4500 K units. The typical gross profit margin for Deep Trench Capacitors (DTC) is between 20% and 40%.

The Deep Trench Capacitor (DTC) market is emerging as a high-growth niche within the advanced silicon passive components sector, driven primarily by rising demand for AI and high-performance computing (HPC) processors, compute-in-memory architectures, advanced packaging, and power management ICs. Compared with conventional planar capacitors and discrete MLCCs, DTCs offer significantly higher capacitance density, lower parasitic inductance, and superior integration capability, making them increasingly critical for power integrity in advanced semiconductor systems.

Currently, the market is still at an early to mid-commercialization stage, with deep trench MOS capacitors dominating volume adoption, while deep trench MIM capacitors are gaining traction in high-frequency and high-performance applications. Looking ahead, continued scaling of AI chips, Chiplet architectures, and on-package power delivery is

expected to accelerate DTC penetration, positioning the market for sustained growth over the next decade.
