Abstracts

A counter improvised explosive device (C-IED) is an essential piece of equipment in battlefield operations. Modern-day warfare has also emphasized the use of electronic jammers and detection systems to prevent and locate explosives hidden under the ground. Scope of the Report:

This report focuses on the Defense Counter-IED Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The Americas contributed the largest share in the defense counter IED systems market with approximately 51% share of the overall market in 2015. However, this growth is expected to slow down a tad during the forecast period due to the decline in the budget and cut downs in the defense operations in major countries such as the US and Canada.

End-users in the defense counter IED systems market are shifting their focus from quantity to quality, as well as emphasizing on cost-efficiency in the military operations. Therefore, maintaining a balance between cost and quality and at the same time providing an upgrade and retrofit solutions to meet modern military needs is becoming a challenge for manufacturers in this market.

The worldwide market for Defense Counter-IED Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
