Abstracts

The global Deferiprone market size is expected to reach \$ 50.73 million by 2032, rising at a market growth of 3.2% CAGR during the forecast period (2026-2032).

Deferiprone is an orally bioavailable bidentate ligand with iron chelating activity.¹ It binds to iron in a 3:1 (ligand:iron) molar ratio and, thereby, is able to remove excess iron from the body. Deferiprone has been investigated for clinical use in diseases of systemic iron overload.

Apotex, Cipla and other company are the leaders of the industry, and they hold key technologies and patents, with high-end customers; have been formed in the monopoly position in the industry. Those two totally got about 96% market shares.

North America is the largest consumption region of Deferiprone, with a consumption value market share nearly 28%. Europe is the second largest consumption region of deferiprone, enjoying consumption value market share nearly 24%.

This report studies the global Deferiprone production, demand, key manufacturers, and key regions.
